Introduction

Welcome to STAT 240!

Miranda Rintoul (she/her)

Call me anything.

- 6th year teaching stats at UW
- nth time teaching 240

My commitments:

- Engaging lectures
- Assessments reflect lecture content
- Deadlines communicated clearly
- I will be accommodating to individual needs and situations

Goal: investigate real-world data and communicate results (last unit of class)

Core skills:

R programming	Probability
(first unit)	(second unit)

No prior experience required!

Grade critera:

- 5% Quizzes (2 drops)
- 10% Discussion (2 drops)
- 15% Homework (1 drop)
- 15% Group Project
- 25% Midterm
- 30% Final Exam

Attendance is not graded but lectures are *not recorded*.

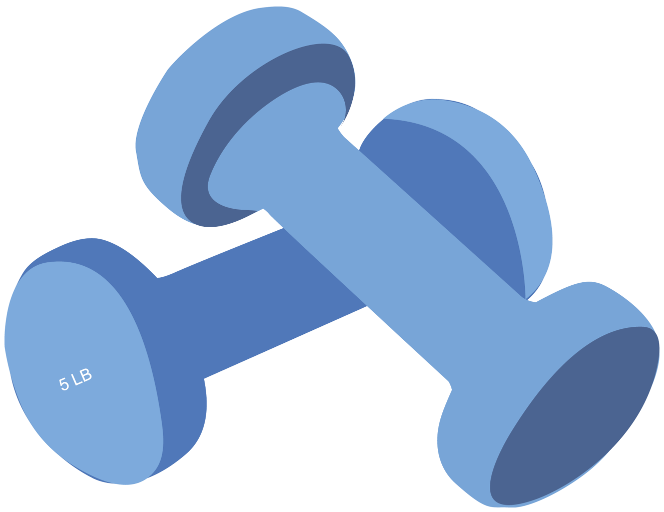
Use of LLMs like ChatGPT

- LLMs are **very good** at writing code
- LLMs are **very bad** at teaching



Use of LLMs must be disclosed!

Download + Install R and RStudio

Step 1	Step 2
R, the language	Rstudio, the IDE

Step 3: tell your friends about **free and open source software**

Looking ahead

In chapter 2, we'll set up a file directory for 240 and review basic features in RStudio. If you want a head start, set up files on your computer like so:
